

Mohammad Shan

shanshaikh880@gmail.com | RAIPUR C.G. | www.linkedin.com/in/mohdshan09

Profile Summary

Full-stack developer with hands-on experience in building scalable web applications and AI-powered platforms including content generation systems and machine learning-based applications using MERN stack and Next.js. Proficient in React.js, Node.js, PostgreSQL, and MongoDB, with strong expertise in RESTful APIs and authentication systems. Experienced in developing production-ready ERP systems, SaaS platforms, and e-commerce applications, with a strong foundation in Data Structures.

Skills

Languages & Technologies: C, C++, HTML, CSS, JavaScript, Typescript

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Numpy, Pandas, Matplotlib

Database: MongoDB, PostgreSQL

Core Concepts: OOP Concepts, Database Management System (DBMS), Operating System, Data Structures & Algorithms

Work Experience

Zidio Development | Full Stack Developer Intern Mar'25 - May'25

- Built the product database from scratch for the company's e-commerce website using MongoDB.
- Designed RESTful APIs with Node.js and Express.js for the website's backend and integrated them with the React frontend.
- Implemented product listings, cart system, and user authentication | Live: forever-frontendv3.vercel.app

BHN System and Solution Pvt. Ltd. | Jr. Software Developer Intern Oct'25 - Present

- Develop a full-stack School ERP System using (Next.js, PostgreSQL, Prisma, and Tailwind CSS)
- Build Student Management, Transport Management, session migration (student promotion), and a reporting module with 10+ reports.
- Migrate legacy data by cleaning raw Excel files into SQL for PostgreSQL, and implement role-based access with NextAuth for admins, teachers, and parents. | Live: <https://eduerp.net/>

Projects

EduERP – School Management System | (Next.js, Typescript, PostgreSQL, Prisma, Tailwind CSS) Oct'25 - Present

- Develop and maintain a full-stack School ERP serving 6+ schools in Gariaband district, working with the backend team to integrate APIs and deliver complete features.
- Migrate legacy school data by cleaning and transforming raw, inconsistent Excel files into SQL queries for bulk import into PostgreSQL, keeping the data accurate for each onboarded school.
- Build and maintain a reporting module with 10+ school reports, letting administrators generate academic and administrative records from a single interface.
- Design ERP-style dashboard interfaces with Next.js, TypeScript, and Tailwind CSS, optimized for data-heavy workflows and responsive across devices.
- Develop a session migration feature that promotes students to the next academic session, automating the year-end rollover for each school.
- Live: <https://eduerp.net/>

ExamLyst – B2B Online Assessment Platform | B. Tech Major Project Nov'25 – Feb' 26
(Next.js, Typescript, PostgreSQL, Prisma, Zustand, NextAuth)

- Built a multi-tenant B2B assessment platform in a team as Full Stack Developer, owning the PostgreSQL database layer with Prisma across organization, admin, client, and candidate workflows.
- Implemented an organization onboarding workflow in which companies request demos and admins approve or reject access, backed by role-based, organization-scoped APIs.
- Designed and implemented secure role-based and organization-scoped APIs, enforcing authentication, approval gates, and access boundaries across question banks, assessments, candidate attempts, and content management.

- Built a question bank and assessment management system with CSV-based question import, reusable question repositories, assessment scheduling, candidate attempts, responses, and integrity/audit tracking.
 - Developed a PDF content repository using Supabase Storage, with document extraction, text chunking, and reusable linking of source documents to question banks; asynchronous processing was handled using BullMQ + Redis.
- Live: <https://examlyst.vercel.app/>

Full Stack E-commerce Website *(React.js, Node.js, MongoDB, JavaScript, Express.js, TailwindCss)* Mar'25 - May'25

- Contributed as a backend development and MongoDB database for core e-commerce workflows, including users, products, carts, and orders.
- Collaborated with the frontend developers to integrate APIs with the React application, resolve data-flow issues, and align backend responses with frontend requirements.
- Themed around Starry Night aesthetics and Comic Superheroes. Zidio offers a visually engaging shopping experience with features like product browsing, cart management, user authentication, and admin dashboard.
- Live: <https://forever-frontendv3.vercel.app/>

QuickAI – AI SaaS Platform *(PostgreSQL, Neon DB, Node.js, React.JS, Clerk, Restful Api's)* Dec'24

- Designed and developed a cloud-based SaaS platform integrating Artificial Intelligence (AI).
- Services: Built an AI-powered SaaS platform integrating multiple AI services including content generation, object removal, resume analysis, and background removal | Live: <https://quick-ai-frontend-zeta.vercel.app/>

Education

Bhilai Institute of Technology Raipur 2022 - 2026

- B. Tech in Computer Science Engineering
- CGPA: 7.37 / 10

Saraswati Shishu Mandir Higher Secondary School Abhanpur 2014 - 2021

- XII (CGBSE) | 84.2%

Certificates

Machine Learning and Artificial Intelligence (AI)

Data Structures & Algorithms using C and C++

<https://www.udemy.com/certificate/UC-7e2500ee-cf3e-4ae2-aedf-a0e66c25fba4/> June, 24

Full Stack Web Development Jan, 25

Research Publications

ExamLyst B2B Online Assessment Platform: Architecture, Integrity Monitoring, and Evaluation April '26

*(International Journal of Progressive Research in Engineering Management and Science (IJPREMS)
Volume 06, Issue 04)*

- Designed and researched an AI-resistant B2B online assessment platform focused on maintaining examination integrity in AI-assisted environments.
- Proposed a secure system architecture incorporating monitoring mechanisms and evaluation techniques to improve the reliability and integrity of online assessments.
- Explored approaches for reducing the misuse of AI tools during examinations while maintaining a reliable and scalable assessment experience.
