

Mohammad Shan

shanshaikh880@gmail.com | +919109462934 | www.linkedin.com/in/mohdshan09

Profile Summary

Full-stack developer with hands-on experience in building scalable web applications and AI-powered platforms including content generation systems and machine learning-based applications using MERN stack and Next.js. Proficient in React.js, Node.js, PostgreSQL, and MongoDB, with strong expertise in RESTful APIs and authentication systems. Experienced in developing production-ready ERP systems, SaaS platforms, and e-commerce applications, with a strong foundation in Data Structures.

Skills

Languages & Technologies: Java, Python, C, C++, HTML, CSS, JavaScript, Typescript

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Numpy, Pandas, Matplotlib

Database: MongoDB, PostgreSQL

Core Concepts: OOP Concepts, Database Management System (DBMS), Operating System, Data Structures & Algorithms

Analytical: Project Documentation, Technical Writing, Requirement Analysis, Report Writing, Data Analysis, Problem Solving

Work Experience

Zidio Development | Internship

Mar'25 - May'25

- Designed and developed full-stack E-commerce Website with responsive UI components using JavaScript, and React.js
- Integrated backend services using Node.js and Express.js
- Implemented product listings, cart system, and user authentication | Live: forever-frontendv3.vercel.app

BHN System and Solution Pvt. Ltd. | Internship

Oct'25 - Present

- Developing a full-stack School ERP system using Next.js, PostgreSQL, Prisma, and Tailwind CSS
- Implementing secure authentication and role-based access control for admins, teachers, and parents
- Designing responsive UI components ensuring seamless experience across devices | Live: <https://eduerp.net/>

Projects

EduERP – School Management System (Next.js, Typescript, PostgreSQL, Prisma, TailwindCss)

Oct'25 - Present

- Working as a Frontend Developer, responsible for developing and maintaining user-facing features using Next.js, TypeScript, and Tailwind CSS, while collaborating with the backend team to integrate APIs and deliver complete features.
- Collaborated with the development team to deliver production-ready web and mobile features for educational institutions.
- Implementing a secure and structured system using Next-Auth with role-based access, allowing **admins**, **teachers**, and **parents** to efficiently manage academic and administrative UI workflows | Live: <https://eduerp.net/>

ExamLyst – B2B Online Assessment Platform | (B. Tech Major Project Phase 2)

Nov'25 – Feb' 26

(Next.js, Typescript, PostgreSQL, Prisma, Zustand, NextAuth, BullMQ + Redis)

- Worked as a Backend Developer and managed the PostgreSQL database layer using Prisma in a team to develop a multi-tenant-ready B2B online assessment platform supporting **organization**, **admin**, **client**, **user**, and **candidate** workflows.
 - Implemented a complete B2B demo-request and onboarding workflow, allowing organizations to submit demo requests while administrators review, approve, reject, and manage their lifecycle before granting platform access.
 - Designed and implemented secure role-based and organization-scoped APIs, enforcing authentication, approval gates, and access boundaries across question banks, assessments, candidate attempts, and content management.
 - Built a question bank and assessment management system with CSV-based question import, reusable question repositories, assessment scheduling, candidate attempts, responses, and integrity/audit tracking.
 - Developed a PDF content repository using Supabase Storage, with document extraction, text chunking, and reusable linking of source documents to question banks; asynchronous processing was handled using BullMQ + Redis.
- Live: <https://examlyst.vercel.app/>

- Full Stack E-commerce Website** (*React.js, Node.js, MongoDB, JavaScript, Express.js, TailwindCss*) Mar'25 - May'25
- Contributed as a backend development and MongoDB database for core e-commerce workflows, including **users, products, carts, and orders**.
 - Collaborated with the frontend developers to integrate APIs with the React application, resolve data-flow issues, and align backend responses with frontend requirements.
 - Themed around **Starry Night** aesthetics and Comic Superheroes. Zidio offers a visually engaging shopping experience with features like product browsing, cart management, user authentication, and admin dashboard.
 - Live: <https://forever-frontendv3.vercel.app/>

Education

- Bhilai Institute of Technology Raipur** 2022 - 2026
- B. Tech in Computer Science Engineering
 - CGPA: 7.37 / 10
- Saraswati Shishu Mandir Higher Secondary School Abhanpur** 2014 - 2021
- XII (CGBSE) | 84.2%

Certificates

- Machine Learning and Artificial Intelligence (AI)** Sept, 24
- <https://www.udemy.com/certificate/UC-68cf2430-0c87-444d-972a-0565608c0452/>
- Data Structures & Algorithms using C and C++** June, 24
- <https://www.udemy.com/certificate/UC-7e2500ee-cf3e-4ae2-aedf-a0e66c25fba4/>
- Full Stack Web Development** Jan, 25

Research Publications

- ExamLyst B2B Online Assessment Platform: Architecture, Integrity Monitoring, and Evaluation** April '26
- (*International Journal of Progressive Research in Engineering Management and Science (IJPREMS)*
Volume 06, Issue 04)
- Designed and researched an AI-resistant B2B online assessment platform focused on maintaining examination integrity in AI-assisted environments.
 - Proposed a secure system architecture incorporating monitoring mechanisms and evaluation techniques to improve the reliability and integrity of online assessments.
 - Explored approaches for reducing the misuse of AI tools during examinations while maintaining a reliable and scalable assessment experience.
 - **Publication:** Volume 06, Issue 04, April 2026
 - **Certificate:** <https://go.fliplink.me/view/B6CF4683-FFD2-495B-B217-44D2F63FFC73>
